Healthcare for Everyone

340B PHARMACY PROGRAM

Your use of the 340B Pharmacy Program allows us to care for more underserved patients in Cowley County, with more comprehensive services, that otherwise would not be available!

 **WHAT IS 340B?**

The 340B program is an essential source of support which allows Community Health Center in Cowley County, Inc. to stretch scarce federal resources and reinvest in patient care. This program permits us to purchase outpatient drugs at significantly reduced costs.

HOW WE USE 340B SAVINGS?

Community Health Center in Cowley County, Inc. uses 340B savings to help out low-income, uninsured, and underinsured patients afford their medication

We are required by law, regulation and mission to invest every penny of 340B savings into activities that expand access to care for our medically-under-served patients. Because of the 340B Program, we are able to provide our qualified patients with a cash discount program in which patients pay a fraction of the retail cost for medications that would have

been to expensive otherwise.
